## IMPL. PROJECT CAPABILITIES STATEMENT

IMPL. PROJECT Global (impl. is short for implementation), was founded in 2015 and delivers data-driven, outcomes-focused, sustainable programs to the world's most vulnerable communities. We are a 501(C)(3) non-profit, non-governmental organization (NGO) at the nexus of stabilization, development, and technology.

We leverage Monitoring, Evaluation, Research, & Learning (MERL), Collaboration, Learning, and Adapting (CLA), local capacity building, and inclusive, data-driven and locally-led, cross-sectoral interventions throughout the international development programmatic cycle.

## Differentiators & Competitive Advantage

**IMPL. PROJECT engages directly with communities to:**

- Survey and assess structural and systemic causes of vulnerability and resiliency.
- Identify, design, and implement locally-led, sustainable and bespoke, programming interventions.
- Implement rigorous MERL and outcome and impact assessments.

**IMPL. PROJECT provides clients and donors with:**

- Robust geospatial visualizations and analysis of community dynamics.
- Concurrent, cross-sectoral data collection and back-end dashboards for near-real time monitoring.
- Sustainable, locally-led, outcomes-driven cross-sectoral programming recommendations.

## Past Performance Examples

### **Barira, Southern Philippines - PVE Success:**

We established near real-time MERL data and indicators, and strengthened community resilience against Islamic State recruitment. Community continues to stabilize and prosper from cooperative governance structures, reduce of out-of-school youth, and increase incomes and crop yields.

- IRS Designation: 501 (C)(3) Non-profit

## Past Performance Locations

- Philippines (countrywide)
- Tillaberi, Niger
- Benghazi, Libya
- Azerbaijan (including Russian and Iranian border regions)
- Adamawa, Kano States, Nigeria
- Brcko, Bosnia
- Port-au-Prince, Haiti
- Chicago, Illinois USA

*Specific past performance case studies available upon request.*

### Azerbaijan - Malign Influence Assessments:

From 2018 - 2022, we conducted ongoing assessments of obstacles and opportunities for USAID Azerbaijan funding and programming, focusing on the political, economic, and cultural setting in which the U.S. competes to assist the people and government of Azerbaijan to reform, modernize, and maintain their independence and sovereignty as well as malign influence mapping.

### Tillaberi, Niger - Rapid Complexity Data Mapping:

In 2017, we collected 2,400 community perception surveys in multiple local languages in 10 days with 16 local enumerators. We delivered bespoke programming recommendations to clients and host government stakeholders.

### Zambales, Philippines - IUU Community Fishing Cooperatives and Malign Influence Data:

In 2021 we organized, trained, and mobilized fishing cooperatives operating to collect data on illegal, unreported, and unregulated (IUU) fishing and foreign malign influence in the West Philippines Sea. We distributed our data to local government units and national maritime partners among other trusted stakeholders.
